Introduction

Dear Customer,

Thank you for ordering Social Bookmarks Submitter - revolutionary social bookmarking software which makes website promotion easier than ever before.

In order to use Social Bookmarks Submitter, your server needs cURL and Zend Optimizer modules enabled (99% of hosting companies install these modules by default).

Below you will find some hosting companies that offer premium hosting packages at surprisingly low price. All these providers offer fast and stable servers which are compatible with Social Bookmarks Submitter in 100%.

[DimeReseller](http://www.webmasterbook.net/resources/dimereseller.php) (see more details and hosting packages from hosting company at <http://www.webmasterbook.net/resources/dimereseller.php>). It's highly suggested to use **Reseller** package for best results and maximum performance (plus, it's cheaper if you host multiple domains because there are no charges for hosted domains).

Attention! Use this link to get \$10 *recurring monthly discount* for Reseller package - http://www.dimereseller.com/hsignup.php?pt=&plan=Custom_5

[Hosting24](http://www.webmasterbook.net/resources/hosting24.php) (see more details and hosting packages from hosting company at <http://www.webmasterbook.net/resources/hosting24.php>). It's highly suggested to use Gold or Reseller plans for best results and maximum performance.

Attention! Enter coupon code **AdSenseBoySpecial** on Hosting24 order form and \$2 *recurring monthly discount* will be applied to your order!

Customer Support

If you experience any troubles installing or using the software, please visit informative and continuously updated software knowledgebase at <http://www.adsenseboy.com/support/> for answers to frequently asked questions and step-by-step solutions solving most common issues.

If the installer does not work properly or the cronjobs do not function, or if you experience any other issues, the knowledgebase will guide you every step of the way in seconds. Please remember – searching knowledgebase instead of submitting support tickets saves your valuable time!

Your order comes with 1st class customer service and professional assistance. The only thing I ask - please read the support desk rules before submitting support tickets in order to allow our support team to start working on your issue instantly (without having to ask many additional questions).

All types of support requests and technical questions should NEVER be sent to the sales email, and you should NEVER ask for assistance via contact form. Sales email and contact forms are used for pre-sale questions only, therefore support requests sent to the sales email are deleted without any notice.

For 1st class customer support and faster assistance, please ALWAYS use official software forum at <http://www.forum.adsenseboy.com/> or private support desk at <http://www.adsenseboy.com/support/> to get your questions answered in minutes.

If possible, please include your login information (software administration panel URL, username and password) when submitting a new support ticket, so our programmers can start working on your issue immediately.

If one of your questions is not answered yet, please do NOT submit a duplicate support ticket. If you have the same question submitted using multiple tickets, our support system automatically marks all your tickets as "low priority" and you will have to wait for replies much longer.

Submit a new support ticket for each new question or problem. If the first problem is solved and you have another question or problem, do not update your old ticket and resubmit. But, if your old question is not answered in full, please update your old ticket in this case.

That's all. **Please kindly follow these simple rules to enjoy customer service you deserve!**

Extremely Important Information

Please take a moment to read **EVERYTHING** on this page. These simple tips will save your time and prevent you from making costly and embarrassing mistakes!

If you have any problems installing Social Bookmarks Submitter, please download the video tutorial from <http://www.submitbookmark.com/videotutorial.zip> for step-by-step instructions on installing and using the software.

If the software requires cronjobs to be enabled, you should NEVER copy/paste the cronjob commands from this user guide into your control panel. Depending on your PDF reader, the cronjob commands may get corrupted and cause problems later (even if they look fine visually). Please ALWAYS enter cronjob commands manually.

License Validation

Software comes with a powerful license validation system in order to prevent software piracy and unauthorized usage.

If a customer shares his license with other people (installation details and IPs used to launch installer are stored), the license will be deactivated automatically and all installations will stop working. You will not experience this issue if you do not share your license.

Software also comes with a protection against fraudulent orders. When a new installation is performed, the installation wizard connects to our license database. Your customer details (home IP address, server IP address, IP address used to make order or launch installation wizard, etc.) are stored on this database. In case an order is fraudulent (or customer wants to make a chargeback), the license is deactivated and all installations will stop working automatically.

Finally, all stored information is forwarded to the Internet Crime Complaint Center, National White Collar Crime Center, customer bank department and your hosting provider (requesting to terminate customer service immediately).

Automatic Software Installation + Configuration + Hosting

This software installation method is recommended for new and experienced webmasters who want Social Bookmarks Submitter to provide better results than expected.

Login to customer center at <http://www.submitbookmark.com/customers.html> and click 'Hosting' link in navigation bar.

Click 'Activate Software Hosting Service' link and our team of experts will install and configure software on powerful servers at the speed of light. Moreover, your installations will be continuously monitored and updated to latest versions automatically in order to save your time and money.

Automatic Software Installation

Social Bookmarks Submitter could be uploaded to your server and installed with single mouse click. Please follow instructions below to automate software installation.

Login to customer center at <http://www.submitbookmark.com/customers.html> and click 'Installations' link in navigation bar.

Click 'Start New Installation' link and follow instructions on screen to install software on your website. Please note single installation allows you promoting unlimited number of sites hosted on different servers, so there is no need to make a separate installation on each site you own.

Please note: this feature works with cPanel servers only.

Manual Software Installation

Installing this powerful software manually is as easy. Please follow the step-by-step instructions to complete the Social Bookmarks Submitter installation.

Upload all files to the domain where you wish the software to be installed. All files must be uploaded in BINARY mode only (refer to FTP client help file if you are unsure how to configure FTP software for BINARY uploads). Usually the files need to be uploaded to the public_html or httpdocs directory.

Chmod files 'chmod_sbs_config.php' and 'social_cookie.txt' to 777 using your FTP client.

Login to your cPanel (or another hosting control panel) and setup new MySQL database, user/password. Add MySQL user to the database and grant all permissions.

Run your browser and open http://www.yourdomain.com/social_install/ to start the installation wizard. Please follow all instructions on the screen to complete your installation. If you need more information regarding any field (which need to be filled), move your mouse over the green help icon (displaying '?' symbol) for more details.

After filling all fields (all settings can be changed later), click the 'Install' button. If any errors are detected, the installation wizard will provide instructions on how to fix them. Otherwise, you will be able to login to the administration interface and start using the software.

Do not forget to delete the 'social_install' directory and chmod file 'chmod_sbs_config.php' back to 644.

Finally, you need to setup bookmarking cronjob. Enter Cronjobs section in your hosting control panel and setup this cronjob to be launched:

php -q /home/cpanel_username/public_html/social_posting.php

Attention! Please remember you need to change 'cpanel_username' into real username of your cPanel account.

Attention! Never copy/paste cronjob command from PDF file and always enter it manually, otherwise software will not work.

Attention! Please note you must leave space symbol before and after '-q' symbol, otherwise software will not work.

It's not recommended to launch cronjob more often than 5-7 hours, otherwise your social account(s) may be disabled due to spam. If you believe cronjob doesn't work properly, please verify it's entered correctly. If you are unsure, please contact your hosting provider (only hosting provider could verify cronjob settings) and ask if your cronjob is configured correctly.

Congratulations! You have just installed the world's most powerful social bookmarking software! I hope you really like it...

Administration Interface

Here you can adjust software settings and perform advanced administrative tasks to customize website promotion campaigns according to your personal needs.

The main administration interface page displays all of the software details, enables you to check for updates, and displays various notes related to website promotion campaigns.

If you ever need more information regarding the options in the administration interface, move your mouse over the green help icon (displaying '?' symbol) for a full explanation of the option.

PROMOTED DOMAINS

Add New Domains

Here you can add new domains to bookmark.

Social Bookmarks Submitter selects and submits one random domain to all social networks automatically each time when bookmarking cronjob is launched.

Edit Domains

Here you can edit promoted domains. Individual title, description and keywords can be assigned for each domain.

If you want domain to be deleted, check 'Delete' box near domain URL to delete it.

If green icon is displayed, it indicates this domain has already been submitted to social networks. Move your mouse over green icon for more details. If red icon is displayed, it indicates this domain has not yet been submitted.

Submission Reports

Here you can see bookmarked domains. Each record displays exact submission date and social account used for bookmarking.

SOCIAL ACCOUNTS

Add New Accounts

Here you can add new social accounts.

When new accounts are added, please go to 'Edit Accounts' section and click registration links (red icon) near each new account in order for Social Bookmarks Submitter to register new accounts on social networks automatically.

Edit Accounts

Here you can edit social accounts. If account password or email is changed here, you must update email/password on social networks manually.

If you want account to be deleted, check 'Delete' box near username to delete it.

If green icon is displayed, it indicates this account has already been registered on social networks. Move your mouse over green icon for more details. If red icon is displayed, it indicates this account has not yet been registered. Click this red icon to launch automatic registration engine.

EXTRA PLUGINS

Sitemap Spider Plugin

Sitemap Spider helps to promote different URLs easier. This powerful plugin automatically parses records from unlimited number of XML sitemaps and adds these URLs to software for automated bookmarking. Plugin scans all sitemaps for updates every day and adds new URLs automatically, so you will never need to do it again.

Feed Spider Plugin

Feed Spider helps to promote different URLs easier. This powerful plugin automatically parses records from unlimited number of RSS feeds and adds these URLs to software for automated bookmarking. Plugin scans all feeds for updates every day and adds new URLs automatically, so you will never need to do it again.

SOFTWARE SETTINGS

General Settings

Here you can manage general software settings to customize website promotion campaigns and tweak software according to your personal needs.

PROXY SERVERS

Add New Proxy Servers

Here you can add new proxy servers.

All proxy servers should be fast and 100% working. If any of proxy servers does not work during submission, domains will not be bookmarked successfully.

Edit Proxy Servers

Here you can edit proxy servers.

If you want proxy server to be deleted, check 'Delete' box near proxy IP to delete it.

DATA IMPORT & EXPORT

Add New Proxy Servers

Here you can import data from another Social Bookmarks Submitter installation.

Copy data from another installation using 'Export Software Data' feature and paste it here. Do NOT make any changes to data, copy/paste data as it is.

Edit Proxy Servers

Here you can export data to another Social Bookmarks Submitter installation.

Copy data you want to export and paste it to another installation using 'Import Software Data' feature. Do NOT make any changes to data, copy/paste data as it is.

ADMINISTRATOR SETTINGS

Change Password

Here you can change password for admin user. Enter the same password into both fields and click 'Save Changes' button. Please note password must contain 5 symbols at least and you may need to login again after changing admin password.

Check for Updates

In this area you can check for any new version of the Social Bookmarks Submitter.

Help Section

In this area you can find answers to frequently asked questions about using Social Bookmarks Submitter and find solutions to all common issues.

Please study this section carefully before contacting the support team.
